Bogoda Bridge is a 45 minute drive from the resort. It is the only roofed 16th century Kandyan bridge left in Sri Lanka. Near the bridge is a 1st century Buddhist temple.

It was constructed entirely of wood with massive tree trunks for buttresses. Amazingly, no nails were used in the construction.

Next stop is Demodara Nine Arch Bridge – a beautiful and amazing bridge built between two railway stations - Ella and Demodara - during the British colonial period.

Last stop is Demodara Railway Loop – designed and built during the British colonial period in the shape of a turban – a unique feature in the hill country. The rail track goes around the mountain in a loop and then through a tunnel beneath the Demodara Railway Station. Great fun.

Arugam Bay is one of the world's top ten surf destinations. It is situated on the east coast of Sri Lanka and if you are into wind-surfing, rafting, fishing or swimming, Arugambay is for you.

Beyond surfing there are many things to do: lagoon tour, bird watching, elephant watching, Kumana National Park, Kudumpigala monarchy and many ancient ruins & archaeological sites.

There are not only surfers but also many nature lovers visiting Arugam Bay. Nature abounds here where the ocean meets the beach. Keep your camera handy.

The bay hosts a large fleet of fishing boats which operate off the beach – many organizations donated boats after the tsunami and as a result there are far more fishing boats than ever before.

4WD Tour to Udu Diyaluma

Diyaluma waterfall, in Badulla district, is Sri Lanka`s most beautiful waterfall and the second highest (220m). It is also the 361 st highest waterfall in the world.

It will take you about 20 minutes to trek to the falls over a dry rocky river bed. No problem.

The waterfall is formed by Punagala Oya. The Diyaluma waterfall flows towards Kirindi Oya under a bridge on the highway from Beragala to Wellawaya.

The amount of water is so great during the rainy season that it falls from head to foot with no intermediate cascade whatsoever. What a sight to see.

Legend has it that the gods created this waterfall to weep forever over a tragic, princely love affair gone bad. Bummer.

The Wisari Ella, also known as the Alikola Oya North falls, lies hidden deep inside the mountains of Uva province.

The 20 meter high waterfalls are formed by the Punagala and Alikola Rivers, which flow from the Maha Kande mountain's eastern slope. The falls flow into the Kirindi Oya.

We'll park near a paddy field where the vehicle can be stopped and turned around. From here you'll walk about 500 meters on a walkway which has been recently built by the local government body for your convenience.

There's no hard climbing – your mini trek passes through small vegetable plots, tea plantations, jungle and some interesting caves.

The path ends at the bottom of the falls and a viewing platform has been built for a fabulous view of the waterfall. Get wet.

Dunhinda Falls is located about 48 kms from Ella Jungle Resort. The falls are one of Sri Lanka's most beautiful.

It's an easy 25 minute walk to the waterfall. But you will have to cross a wobbly Indiana Jones style suspension bridge to get there. So cool.

210 feet (64 m) high, it gets its name from the "smoky dew drops" spray below – "Dun" in Sinhala means mist or smoke which surrounds the area at the foot of the waterfall.

The fall's source is the river Badulu Oya which meanders through Badulla town.

Below Dunhinda there are three major dams: Randenigala, Rantambe and Victoria. They generate most of Sri Lanka's electricity.

You'll enjoy your picnic lunch overlooking the waterfall but you will have to speak quite loudly to be heard.

Although there is no documented information about this site in the ancient scriptures, different historians have dated these statues from the 6th century to the late Anuradhapura period (between the 8th and 10th century). These carvings are in the Mahayana Buddhist style and belong to the Pallawa Sri Lankan art tradition.

Second, it provides many unforgettable experiences like village life, paddy fields, rivers, amazing views and a beautiful waterfall.

To get to the waterfall you will trek 1.5 km through dense jungle, rocky river beds and fast flowing streams. It's fabulous but please ... be careful.

Kayaking at Hadapanagala Reservoir

Handapanagala Reservoir is 16 km from Wallawaya town. There is a rock plain on the either side of the dam.

It is full of water throughout the year – fed by the Kirindi Oya river.

The inland fishery industry is big around these parts. You'll surely see some locals fishing for dinner. Good luck.

The reservoir is popular among locals and foreigners alike as an elephant watching place.

Elephants gather at the reservoir every evening. For this reason dusk is the best time to visit Handapanagala Reservoir.

Any time is a good time to bird watch at the reservoir. There are dozens of birds in and around the water. Probably also looking for their dinner.
